Comment: Make your name the largest font on the page, not too big, but enough to stand out. Its up to you whether or not you want to include your address, most people leave it off. If you have a website, add it, if you don't, no big deal.

Comment: A line makes a nice dividing point for your information and keeps things organized. In Word, from the top menu, select "View", under "Toolbox" select "Object Palette" and you will find lines to insert. Right click to change the color of the line to black.

Comment: Hopefully you've had at least 2-3 musical theatre experiences if you are considering a career on the stage. List chorus as ensemble. In general keep it to your high school years. You have two options here in regards to "year" and how you order things. If you want to show a lot of recent growth, years can help show a progression of experience. If your experience has been varied, take of the year, and order the roles in level of importance. If you've worked with well known directors, use "dir. Last_Name" instead of year. If you leave the 4th column off, scoot "Role" towards the center and company tow... [1]

Comment: If you've gone to performing arts summer camps or workshops, list them here. If not, its not a big deal, go ahead and eliminate this category.

Comment: This section can get ridiculous. Try to use it to list languages, instruments, skills, and then one or two conversation starters (some ideas included). Be prepared though to do anything in this section on the spot.
